5 The copy of the notice issued by the Informer referred to in para 1 of the petn has not been enclosed. The legality of the issue of the notice has been questioned. The Informer should have issued the notice under Sec 170 of the Municipal Regn VII of 1931

seems alright
as per petn 7/9

GTM—Contr Sheet

WD 70—GBPM—60,000—13-8-3

nee the new Rgn came into force from 1 8 33
and not under section 141(a) of the repeal of 1906.

The Section 141(A) of the Act, Rgn which came
into force from 30 12 31 is as follows
" No shop or place shall be kept for the
retail sale of drugs recognised by the
British Pharmacopœia, not being also
articles of ordinary domestic consumption
unless the same is registered in the office
of the said within two months after the
commencement of this Rgn or if the shop or
place is established after the commencement
of this Rgn, within two months from the date
of its establishment etc etc"

In the face of the specific provision
in the Rgn regarding the time limit,
it is not clear why timely action was
not taken by the Assessor and why a
notice was issued so late as 11-8 33 and
that after the new Rgn came into force
This may if approved be ascertained

Secondly the Assessor contends
that the notice for demand, contemplates
the payment of an annual recurring
fees, which is no where laid down either
in the Act Rgn or in the rules issued
by Govt in the matter Neither the
Act nor the Rgn require the payment
of annual Registration fees

15. There is another petition read from the Secy the Chemists & Druggists Association of the Mysore State, praying for exemption from the payment of taxes in respect of these shops of Chemists & Druggists in view of the heavy taxes & duties they are already paying and of the present depression in trade. It is stated in the linked file that the provision for the registration of shops under Sec 170(1) of the Act applies to such shops, and there is no provision for making any exemption. An endt will if agreed be sent to the Secy of the Association that it is not possible to comply with the request

See 170(1) applies only to places kept for the retail sales of drugs recognised by the British Pharmacopeia. If a medical practitioner has a place where he receives his patients and dispenses medicine for them, such a place does not require registration, according to the orders passed in the linked file. Since sec 170(2) applies only to compounders employed in "such registered shop or place", it may follow as a consequence that medical practitioners having a dispensary of their own, need not have compounders certified under sec 170(2). It is doubtful if this is the intention of the Legislature. This is a point which does not appear to have been considered and perhaps the further views of the Senior Surgeon may be called for if it is intended to pursue the matter further.

As for the registration fee to be paid under sec 170(1), I agree that it is to be paid once & for all at the

To

Sir Mirza Ismail Esq , Kt , C I E , O B E ,

Dewan Of Mysore,

Bangalore

From

The Secretary,

Independent Medical Practitioner's

Association Of Mysore,

Bangalore,

Sir,

The City Municipal Commissioner, adverting to Government Order No: L 6934/ Ll 213-31 dated 13th April 1932 prescribing fees of Rs 30/- in case of District Head-quarters and City Municipalities of Bangalore and Mysore and Rs 10/- in case of other Municipalities for the registry of shops and places kept for sale of European Drugs, sends out a memo to all chemists and dispensaries to get themselves registered under sub-section (1) of 141 a) of the Mysore Municipal Regulation by payment of Rs 30/- per annum within a week from 11th August 193?-

2 This Section 141 (a) with its subsections refers to ruinous buildings and has nothing whatsoever to do with the registry of shops and places kept for the sale of European Drugs as erroneously connoted in the notice of the Municipality issued by the Commissioner

3 It is in section 170 of the Mysore Municipal Regulation of 193? that the registry of shops kept for the sale of European Drugs; has been laid down and our

our association begs to bring to the notice of the Government the extent of callousness with which this important matter as fresh taxation of the Chemical trade and medical profession is administered by the Municipal authority

4 The Registr tion Fee is always non-recurring and can never be annual as medical Practitioners reg ster once by paying Rs.15/12- to the Medical Council and not annually as is laid down in the Municipal Notice

5 Neither Municipal Regulation VII of 1933 nor the G O referred to contemplate or authorise the Registration Fees to be paid annually, but the notice of the Municipal Commissioner rides rough shod - against the point and spirit alike of the Municipal Regulations and the Government Order

The Independent Medical Practitioners of Mysore request the Government to clarify the matter for the Municipality before such adverse administration of Government orders and Regulations is allowed to harass the Public

The Regulation VII of 1933 has very loosely captioned shops kept for the Retail sale of European Drugs, thereby leaving unscathed the wholesalers like Labbeys and others, who do the bulk of the trade, and are solely responsible for the dumping of the market with Patent and Pharmacopic medicines of all sorts and conditions and carrying on unfair competition with Chemists and Doctors by selling wholesale and Retail at unscrupulous prices without reference to quality nd purity of drugs they vend

Then they are left free to further exploit an

an expert business without training or qualification and it is common practice for patients to dope themselves under the counsel of these vampires

The Dansaries carry on a roaring trade in many drugs recognised by the British Pharmacoepia and they are left unhampered any poisonous drugs and complicated chemicals in toxic quantities and qualities are made available by this class of druggists, who are left scot free to carry on their lethal trade - unhampered in any way

The Municipal Regulations and Government Order tackle only the Chemists Shops and qualified Doctors in retail trade and no exemption is granted to medical men since as a privileged class The Doctors have to use drugs in their practice and it is restricting them in the free exercise of their profession to compel them to register their Dispensaries by payment of Fees to the Municipality since handling of Drugs is incidental to the practice of medicine and not a trade divorced from the exercise of their profession While the - chemists carry on their trade as a separate calling for profit and carry on retail sale of European Drugs, the medical men manipulate and handle them for the healing of the afflicted in their practice and in that sense not commercial The Chemists charge for their products of compounding and the Physicians charge for their products of professional and therapeutic skill

The Chemists compound mixtures pills and powders mechanically on the directions laid down in the prescriptions of the Physician and hence the wages charged for their goods are for mechanical labour only The medical men charge their products for skill and efficiency

efficiency and not for technique of preparation

In India, the system of combining the practice of medicine with that of dispensing is rightly or wrongly in vogue, although, in most of the foreign countries, medicine and pharmacy are kept entirely distinct The system is ingrained in India and having regard to the abdence of qualified pharmacist its continuance seems inevitable It is not for us to go into the ethics of such combination minutely, and we fail to perceive anything flagrantly indecorous or unrighteous about it And we bring to impress the Government of Mysore that in - view of the infancy of the Independent Medical Profession of Mysore and the entire absence of a class of qualified chemists that command the implicit confidence of the medical profession, the qualified medical men in Mysore be exempted from registry fess of Rs 30/- as a privileged class whose handling of medicines and retailingof European Drugs is incidental to the exercise of their profession and not a trade or calling carried - entirely for profit as in the case of Chemists and - Druggists

" European Drug " is a term that is too vague, elusive and delusive and the adoption of such loose terms in specific sections of Regulations has left room for faulty interpretation and defective administration of Law

As long as anybody in the street, (includin the hawker cleaning the ears of people for a quarter-anna) is allowed to be doctor, chemist and dispenser - all combined - nothing effective could be done and regulating the regulated Regulars is all that is being done by defective regulations spasmodically brought about by Government to appease Public clamour

The gravamen of the entire fault of such regulations can be laid at the door of hasty Legislation carried with " Push Tactics " without the presence of representating of the various trades and callings at the Legislative Hall to consult on the divers and diverse bearings and repurcussions of the provisions of the regulations or the professions con erned

The profession of pharmacy is yet being conceived in the womb of progress in India and the cognate profession of Medicine, especially in Mysore, is yet coming into being as an Independent entity and itself quite premature for the Municipality to have thought of fitting both with the same Regulation Rod, when both the Babe and the Batcha are yet learning to crawl and limp

The Independent Medical Practitioners Association of Mysore respectfully pray that the qualified medical practitioners be exempted from the registration fee of Rs 30/- leaving strictly alone the degenerate practitioner out for his pill by maintaining a chemists' shop rather than a dispensary, we request that Independent Medical Practitioners maintaining their dispensaries be exempted from the Registration Fee of Rs 30/-.

It is like putting the cart before the horse to have imposed a Registration Fee of Rs 30/- on all places kept for the sale of European Drugs without specifying who can sell them and restricting their sale A comprehensive survey of all the shops and places kept for the sale of European Drugs in Mysore must have been made and expert opinion obtained before forging ahead on the Legislative anvil such fresh levy involving many technical points

I, as the secretary of the Independent Medical

Medical Practitioners Association of Mysore , most respectfully submit that alot of leading points and comprehensive evidence is available for reference in the Report of the Drugs Enquiry Committee 1930-1931, published as the Government of India Blue Book in the month of January 32 and much spade work has been done by the learned Committee in the matter

We, most respectfully beg to commend the aforesaid Report for the earnest attention of the Government Of Mysore in tackling with the control and administration of Drug Trade in Mysore. A systematic study and adoption of its recommendations mutatis mutandis for Mysore shall obviate many such pitfalls as the Municipality are bidding

The Drugs Enquiry Committee appointed by the Government of India examined me as an expert witness before their Committee at Bangalore in 1930 and what is more, Col Chopra, the Chairman of the Drugs Committee solicited a special memorandum from me on the ~~complica-~~ -tion of an Indian Pharmacoepoea , which memorandum has been only published in the Government of India Blue Book, aforesaid

Under these circumstances we the Independent Medical Practitioners of Mysore through our Secretary solicit exemption from the Registration Fees and assure the Government of Mysore every support and cooperation for all measures to improve the morale of Medical and Pharmaceuticals , Professions of Mysore,

I beg to reain,
Sir,
Yours obedient servant,

Bangalore city

Sir Mirza M Ismail, Kt , C I E , O B E,

Dewan of Mysore,

BANGALORE

REV SECT, 22 SEPT 1933 L & G BRANCH

Sir,

This may be forwarded to General Secretary for disposal & 18/9/33

Respected Sir,

1226

On behalf of the Chemists & Druggists Association of Mysore State, I beg to submit the following representation, - with reference to the Government Order No L 6934/Ml 213-31, dated 13th April, 1932, and the recent Circular dated the 11th August, 1933, issued by the Municipal Commissioner, Bangalore City Municipality-- Copies of which are herein enclosed-- calling on most of the Allopathic Doctors and the Chemists and - Druggists of this City, to register their places by paying Rs 30/- per annum

A few of the Doctors as well as Chemists and Druggists who discussed this subject with some Municipal Councillors and Legislative Council Members, have been informed, that this - new tax has been levied, firstly, to enable the Government to have some effective control over places selling European Drugs, and secondly, as a source of revenue to the Municipalities

General Secretary Mysore Chemists' Assn 180 Bangalore 18/9/33

Every one of the Chemists and Druggists have executed with the Government a minimum of four Agreements-- three of which

Rs 4/80 — 2 4/80 Stamp 2/9

which are on Stamped Paper-- for

1 Keeping Dangerous Drugs,

2 Medicated Wines,

3 Alcohol or Rectified Spirits

and 4 For stocking Methylated Spirits

In addition to this, they have to obtain a Permit from the Government Excise Department, every time they import Dangerous Drugs and Spirituous Preparations, open the cases in the presence of Excise Officers and get the contents verified Only after this, they can begin to sell Besides, they have to keep day-to-day Accounts of the drugs sold and get these also checked by the Excise Officers

It will thus be clear that, so far as control is desired, the Government have already a very effective one over the Chemists and Druggists Therefore, the danger from ignorant Stockists of European Drugs is to be looked for, not from the Chemists and Druggists, but from a large number of Provision Stores and Ayurvedic Doctors, who are not under any control till now

As for fresh taxation, the Chemists and Druggists are already paying every year Rs 23-8-0 to the Government, for obtaining the four Licenses already mentioned Added to this, the Government are levying an Excise Duty of Rs 5/- per Proof Gallon of alcohol contained in Spirituous Preparations, which will be raised, it is strongly rumoured, to Rs 10/- shortly, Rs 8/- for every pound of Rectified Spirits and Annas Eight per gallon for Methylated Spirits, on every lb of these products stocked

The new tax, therefore, is one which falls very heavily

heavily on the Chemists and Druggists, the more so at present, as, owing to the reduction in the purchasing power of the people, even the upper Middle Class are going for treatment to Government and other Free Hospitals, with the result that the Allopathic Doctors, who are the buyers of European Drugs from us, are indenting for smaller quantities Even these Doctors are hard hit and most of them are doing o u r business Due to these causes, the income of the Chemists - and Druggists has reached a level at which further taxation will disable them to carry on the trade efficiently, and - threaten their very existence

Hence, on their behalf, I most respectfully request you to look into this grievance and kindly grant an exemption from the payment of this tax The Chemists and Druggists join other Mysoreans in their heartfelt gratitude for your - gallant fight before His Majesty's Government, for the withdrawal of the Subsidy and are fully hopeful that you will - view the new tax in the same spirit, and grant us relief from it

Thanking you,

I beg to remain,
Respected Sir,
Yours faithfully,
TB Ramachandra
S e c r e t a r y,
The Chemists & Druggists Association of Mysore State

5/10

1541/L

9-7-1933

Copy of the petition submitted to the Commissioner, Bangalore City Municipality

To

The Commissioner,

Bangalore City Municipality,

Bangalore City

Sir,

With reference to your Circular dated 11th August, 1933, intimating that our Dispensary should be registered by paying an annual fee of Rs 30/-, we beg to point out that it is our firm belief that the Regulation No 170 of the Bangalore City Municipality is not applicable to us-- Registered Qualified Practitioners-- as it is quite obvious that no Government or Local Body would ever contemplate of stifling Scientific Treatment of Ailments by imposing upon the qualified Practitioners conditions which virtually reduces them to the level of men who trade as doctors and chemists, just because the latter happen to command a little capital That the Government of His Highness the Maharaja of Mysore have recognised the necessity of according some privileges to the Registered Practitioners is evidenced by the fact that in their Notification No F L 4949, Excise 11-23-104, dated 25th February, 1926 (Dangerous Drugs Rules) have stated that "An Approved Practitioner, may possess for his own use in practice, but not for sale" a certain quantity of dangerous drugs without a license, -(Vide No 6 Possession),- and a perusal in full of the said Notification will show that the Approved Practitioner has a status given to him different to that of a licensed dealer or chemist

We are very surprised indeed that Registered Practitioners of Allopathic System who do not dispense outside prescriptions should be called upon to register their dispensaries

dispensaries, while the Practitioners of the Indigenous System, the great majority of whom are not qualified in the System they practice and who also stock and make use of in their prescriptions the drugs of British Pharmacopia, including poisons, are exempted from registration with the Municipality

May we point out, Sir, that as Registered Practitioners, we are already under the notice of the Medical Council, and as such, it would be superfluous to subject us to the scrutiny of any - other Body?

We take this opportunity to emphasize that undue restrictions of the nature detailed in the present Circular, not common any where else, as far as we are aware, should not be contemplated, if the Independent Medical Profession is to develop in the State and keep engaged the young men who are qualifying every year from the Medical Institutions of the State, in numbers greater than the Government can employ, and thus relieve the - Officers of the fully equipped Medical Institutions of the routine treatment of common ailments and enable them to devote larger part of their time for scientific researches and treatment of complicated cases requiring great concentration of energy and skill

We are, Sir,

Your most obedient servants,

Bangalore,
